Dear Leslie.

I just wanted to give you an update on the progress of the Devils Slide LMO.

Since we met in your office earlier this year, we have completed the core drilling for the Geo-Technical Analysis and the analysis is well under way.

We have also updated our topography maps (as of April 2009) and have contracted with Tim Mather P.E. from Infomaption, Inc, in Fort Collins to do the drainage study for the Devils Slide site.

We anticipate have the Geo-Technical Report and the drainage study completed by the end the third quarter of this year and are hoping to have the LMO ready to submit by the fourth quarter.

I am also copying Tim Mather on this e-mail as he may want to contact you should he have any questions regarding the drainage study.

Please do not hesitate to call or contact me by e-mail should you have any questions or concerns.

Regards,

Mike Toelle
